Summary

I am a recent computer engineering graduate with a strong interest in programming, data analysis, and finance. I am looking to join a dynamic team where I can apply my knowledge and add value through programming.

Skills

Languages: English (fluent), Spanish (native)

Programming: Python (advance), SQL (intermediate), VBA (basic)

Software: Excel, PowerBI, Cisco Packet Tracer, Linux, Git/Github, Docker, Mulesoft

Soft skills: Effective communication, Critical thinking, Results-oriented, Strategic adaptability, Self-management, Continuous learning mindset

Education

BS **Universidad Nacional Autónoma de México**, Computer Science Aug 2018 – Nov 2024

Experience

Facultad de Ingeniería, Assistant professor Sept 2022 – Mar 2023
My responsibilities included grading assignments, creating reports in Excel, managing email accounts, and advising students on course-related matters. 7 months

Projects

Analysis of NVIDIA's Financial Ratios Apr 2026 – May 2026
I calculated and analyzed NVIDIA's key financial metrics for the 2023–2026 period and created a dashboard in PowerBI to present the information

Analysis for the ASOS Store Mar 2026 – Apr 2026
I conducted a descriptive analysis of a bank's data to help assess credit risk more accurately for new loan applications.

NFS Server June 2024 – July 2024
I set up an NFS server on Ubuntu Linux Server using a Docker container network.

Design and Simulation of a Network in Cisco Packet Tracer Oct 2023 – Nov 2023
I led a networking project to design and simulate a WAN network to keep DHCP, DNS, and mail servers running.

MC68HC11 Compiler Mar 2020 – May 2020
I led a Python programming project to design a compiler for the MC68HC11 microprocessor.

Certificates

- English for IT by Cisco (2026)
- Applied Data Science with Python (2025)
- Management Skills Development (2025)
